The Colosseum

Directions

Welcome to the largest amphitheatre, on earth. In front of you stands the might of ancient Rome, written in stone; the legacy of the largest empire the world had ever seen.

How to use audio guides in the Colosseum: Always keep your eyes and ears open. Look out for steps and for uneven floors. Never listen to the audio while going up or down the stairs – they're steep and uneven and you need to concentrate. Use the handrails provided.

1. Introduction, [0.00]

Listen to this before you enter the Colosseum then navigate the entrance procedure through the airport scanners and ticket barriers all the way to the far end of the Colosseum near to the elevator where you will find some steep stone stairs.

2. The Colosseum - why? [2.10]

Directions Part 1: Climb these stairs to the top, then check your maps! If possible, walk into the auditorium from here and turn left to find viewing area which is stop 2. Otherwise follow the map route through the exhibition and then into auditorium, and walk along to reach stop 2.

Part 2: When directed on the commentary, keep the arena on your right and walk a short distance until you get to the railings on your right. Stop there, where you can see everything.

3. The Colosseum - how? [6.51]

Directions: Walk on round keeping the arena on your right. Walk until you're about half way round the arena and you're looking directly across the Colosseum at a crucifix on the other side. Can you see it?

You should end up by an information pillar saying Colosseum Substructures, and by a headphone symbol on the wall indicating 2 – don't worry that's a different audio guide number. We're at stop 3. Check your map for exact locations. Pause your audio and start it again when you're there.

4. The Valley of the Colosseum. [10.59]

Directions: There are some steep steps to negotiate. Use the handrails and concentrate.

Ok, turn with your back to the temples. Look for the bookshop on your left. To the right of it, you'll see signs for Uscita (Exit) and you'll see the stairs. Go down them, talking great care. At the bottom, turn left and left again past some stone fragments to find yourself walking ahead into the arena. You'll be walking the same route the gladiators walked when they entered the arena. Walk as far ahead as you can get. Stoo there.

6. Your life in their hands. [19.08]

Directions: take the ramp out to your right, and follow the arena round, keeping it on your left until you come to a viewing area. Look across the arena to a large crucifix on the far side.

The Sistine Chapel – an overview

Welcome to the Sistine Chapel. You're standing surrounded by what is arguably the greatest artwork in the whole world. It took Michelangelo just four years to paint that ceiling. Look at it – just four years, between 1508 and 1512.

Before he started any work on it the ceiling was just pained in blue with a few glinting stars. Now look at it!

There is a screen about half way down the chapel that stretches from one side of the room to the other. Walk towards it and find a place to stand where you can clearly see the ceiling.

ALTAR WALL

1) The Last Judgement.

Painted by Michelangelo almost twenty years after he'd painted the ceiling, this gruesome scene announces the end of the world.

Sistine Secrets!

Look by Christ's left foot for Saint Bartholomew, kneeling on a cloud. He is holding his own skin - look closely at the skin - that's Michelangelo's face hidden there between the two arms.

2 God dividing Light from Darkness.

Look at the way the figures are viewed as if from below – this is the first time Michelangelo painted figures this way.

Sistine Secrets!

The way Michelangelo planned this ceiling is fascinating – he was really a sculptor not an artist, so he started his painting at the end of the story, with Noah, and worked his way back along the ceiling towards the altar wall end, knowing that his technique for painting would improve as he progressed – and he wanted the start of the story, showing God and the creation, to be the very best that he could. I think he's surpassed himself!

3 God separates the Waters from the Land

Here you can see God, again with his flowing beard and outstretched hands, looking down as he creates the earth and the seas.

Sistine Secrets!

Nobody had seen God portrayed like this before – with his long beard and flowing hair, this was Michelangelo's version – and it's stayed with us ever since. Before this painting of God, he was usually depicted as a hand coming down out the clouds!

4 The Creation of Adam

This has to be one of the most famous images in the world. On the left can you see Adam on his back, with one arm on the ground and the other arm stretched out?

Sistine Secrets!

Look back to the Last Judgment for a moment. When it was finished, the local council insisted that the nudity had gone too far! It had to be cleaned up. So an artist called da Volterra was hired to paint underwear on the more obvious nudes – and he became known for the rest of his life as Il Braghettone – Mr Big Pants!

5 The Creation of Eve

Here God has finally come down to earth and is standing, beckoning to Eve.

6 Original Sin

This story is one that many of us are familiar with – the serpent tempting Eve to try an apple, and the minute she does, both she and Adam are thrown out of the Garden of Eden.

Sistine Secrets!

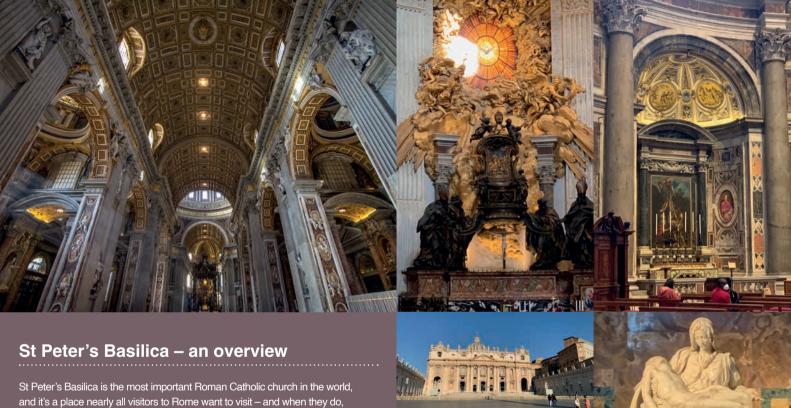

Give your neck a rest for a moment and look to the side walls here. Pope Sisto commissioned painters like Botticelli to paint them. On one side there's the story of Moses and on the other the story of Christ. These are some of the finest frescos in the world - and that was before Michelangelo turned up and painted the ceiling.

7 The Deluge

Well this is Noah's flood. The water of the floods represents the cleansing of the world of sinners.

Sistine Secrets!

Look up at those decorative nude men all along the ceiling. Can you see they're depicted with acorns? In fact there are lots of acorns up there. Why? The Pope who commissioned Michelangelo to paint the ceiling had acorns in his family crest, and his family name was Rovere which means Oak in Italian. This is Michelangelo's way of acknowledging his patron.

it doesn't disappoint.

There is a lot to see here, as you can see! So I have selected the six top stops which are things that I think will interest you, things that you would never see anywhere else on the planet.

Look at your map of the basilica, follow the dotted line, and use this guide to guide you!

KEY

Chapel of the Pietà

This beautiful famous marble sculpture has had a troubled history – she lost four fingers in the 1700s when she was being moved. They were repaired.

2 The Papal Altar

The Papal altar beneath the huge bronze canopy, lies directly over the tomb of St Peter. The Pope is the only person allowed to celebrate Mass at this altar.

3 The Baldachin

This was made by the sculptor Gian Lorenzo Bernini, known as the 'Shakespeare of sculpture'.

The Dome of St Peter's

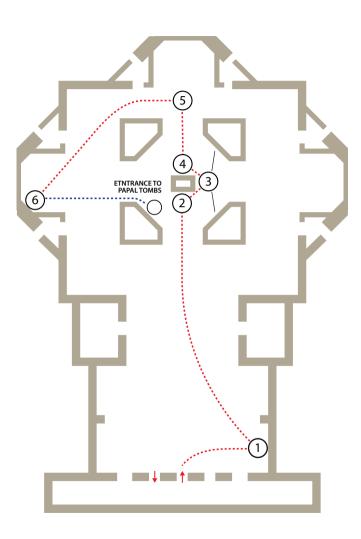

Look up. This dome was designed by the world-renowned artist and sculptor Michelangelo, although it wasn't finished in his lifetime.

The Throne of St Peter in Glory

Look closely at the throne. You'll see it's a bronze piece decorated in gold.

6 The Altar of the Crucifixion

It is said that St Peter was crucified upside down in the middle of giant race track in ancient Rome called Nero's Circus.
